ı.	Transmission	de	la	traduction	au	déposant
----	--------------	----	----	------------	----	----------

\neg	Le Bureau international transmet ci-joint copie de la traduction en langue anglaise du rapport pré	liminaire international sur la
_]	brevetabilité (chapitre 1).	

Le Bureau international transmet ci-joint copie de la traduction en langue anglaise du rapport préliminaire international sur la brevetabilité (chapitre II).

2. Transmission d'une copie de la traduction aux offices désignés ou élus.

Le Bureau international notifie au déposant qu'une copie de cette traduction a été transmise aux offices désignés ou élus suivants qui exigent la traduction en question:

KR

Ċ

Déposant

Les offices désignés ou élus suivants ayant renoncé à l'exigence selon laquelle la transmission doit être effectuée à cette date recevront une copie de cette traduction du Bureau international seulement à leur demande:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Rappel concernant la traduction dans la ou l'une des langues officielles de l'office ou des offices élus.

Il est rappelé au déposant que, lorsqu'une traduction de la demande internationale doit être remise à un office élu, cette traduction doit comporter la traduction de toute annexe du rapport préliminaire international sur la brevetabilité (chapitre II).

Il appartient au déposant d'établir la traduction en question et de la remettre directement à chaque office élu intéressé dans le délai applicable (règle 74.1). Voir le volume Il du Guide du déposant du PCT pour de plus amples renseignements.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/FR2004/050138

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1.	Statement				
	Novelty	(N) .	Claims	1-5	YES
			Claims		NO NO
	Inventive	e step (IS)	Claims	1-5	YES
			Claims		NO NO
	Industrial applicability (IA)		Claims	1-5	YES
			Claims		NO

- 2. Citations and explanations (Rule 70.7)
 - 1. Reference is made to the following document:

FR-A-2 809 047 (COMMISSARIAT ENERGIE ATOMIQUE)
23 November 2001 (2001-11-23).

- Independent claims 1 and 4
- 2.1 Independent claim 1

Document FR-A-2 809 047, which is considered to be the prior art closest to the subject matter of claim 1, describes (the references between parentheses apply to said document):

• an actuation device including at least two motors (17) that are positioned side by side (see figure 1) on a single part (1) and do not extend in a main direction of extension, and drive shafts that extend in a single direction away from said motors and in the main direction of motor extension.

It follows that the subject matter of claim 1

International application No.
PCT/FR2004/050138

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

differs from this known actuation device in that:

 said actuation device further includes at least two pulleys that are at least essentially coaxial, actuated by said motors and offset along the length of said drive shafts provided, in turn, with pulley-engaging portions that are also offset.

It follows that the subject matter of claim 1 is novel (PCT Article 33(2)).

The problem that the present invention is intended to solve can therefore be considered to be that of providing a more compact actuation device.

The solution to this problem, as proposed in claim 1 of the present application, is considered to involve an inventive step (PCT Article 33(3)), for the following reasons:

No such arrangement of two motors and two at least essentially coaxial pulleys offset along the length of drive shafts, which have, in turn, pulley-engaging portions that are also offset so that the actuation device is more compact, is described or obvious from the available prior art.

2.2 Independent claim 4

Independent claim 4 defines an articulated arm

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/FR2004/050138

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement including an actuation device as per claim 1. a result, claim 4 fulfils the PCT requirements of novelty and inventive step.

Dependent claims 3 and 5 3.

Box No. V

Claims 3 and 5 are dependent on claims 1 and 4, respectively. As such, said claims therefore also fulfil the PCT requirements of novelty and inventive step.
